

PRESS ANNOUNCEMENT

trinovis/Impress exhibiting and included by Accenture at the SAP International Utilities Conference in Munich on 14-16th October 2009.

Hannover, 29th September 2009: trinovis GmbH (hereafter referred to as: trinovis), located in Hannover, is pleased to announce that it will be exhibiting at the 7th SAP International Utilities Conference in Munich at the International Congress Centre on 14th to 16th October 2009.

Recognised as the number-one utilities networking event for SAP customers and prospective customers, the SAP IUC is run biannually and attracts an audience of typically 1,500 people who come together to evaluate how to transform the current industry challenges into new opportunities. Topics for the 2009 conference will include:

- New Processes and Major Industry Trends
- Enterprise roles and systems usage that is appropriate for regulated versus deregulated markets
- Sector specific topics such as electricity, gas and water
- Additional focus on "sustainability" and "smart grids/advanced metering infrastructure"

On stand 2.45 in the exhibition area, trinovis will be demonstrating Impress for GIS as a foundation to successful Enterprise Asset Management and CRM. Impress for GIS is a process-level application integrating SAP and ESRI's ArcGIS providing efficient work and asset management processes, powerful asset analysis and management reporting. Also demonstrated will be Impress for EPM (Enterprise Project Management), a process-level application integrating SAP with Primavera or Microsoft Project for efficient and effective project and work management. trinovis/Impress is the leading supplier of applications integrating SAP with ESRI, Primavera and Microsoft Project.

Additionally, on stand 2.43 Accenture will be showing their Accenture Utility Services Model (AUSM) demonstration which utilizes Impress for GIS integrating SAP EAM and ESRI ArcGIS and Impress for EPM integrating SAP EAM and Primavera P6. AUSM is hosted at Accenture's India Delivery Center. This landscape demonstrates Accenture's capability of delivering end-to-end business scenarios for transmission and distribution utility clients.

"With our 13 years partnership with SAP and the IUC as the leading SAP Utility Industry event, it is an ideal forum to outline the business case for Impress applications", explained Paul Groves, Sales Director, trinovis/Impress Solutions Group. "Impress for GIS ensures the core asset consistency between SAP and the spatial environment, upon which all other maintenance, planning, customer service and asset investment applications depend, and Impress for EPM is applicable for routine maintenance, new capital build projects and generation plant shutdowns/turnarounds, all highly topical within the competitive and developing global utility marketplace."

About trinovis/Impress

In September 2008, trinovis GmbH acquired the software, personnel and assets of Impress Software continuing the on-going sale, support and development of the Impress for EPM and Impress for GIS applications. Both trinovis and Impress Software were founded in Hannover, Germany based on the same core technology, both accredited partners of SAP and both deeply involved in integration with SAP ERP.

Impress Software is a leading technology in configurable integration applications that enable quick and cost-effective integration of project management and geographical information systems with SAP, resulting in streamlined business processes. Rather than having to work through the many technical issues of a data-level custom integration from design to technology, tools, maintenance, future support and upgrades, with a proven, supported and upgradeable process-level integration application, organisations can instead focus on business processes and benefits achievable in a fraction of the time and cost.

Impress professional services deliver best-practice knowledge and expertise proven in more than 100 complex integrations implemented globally with SAP. Customers include industry leaders such as BP, Halliburton, Rockwell Collins, US Army, Valero, Nebraska Public Power District, Rockwell Collins, AOL, Ericsson, Saudi Aramco, Aquarion and HydroOne. Impress also works with industry leading partners such as Accenture for complete systems delivery.

For more information about Impress for EPM and Impress for GIS integration applications, visit the Impress website at www.impress.com.
